FWWP FMR

FLATNESS-MEASUREMENT RULER

Measuring road surfaces and examining them for unevenness plays an important role in asphalt. The FWP FMR comes into play to simplify this process and also to make it more precise. The straightedge consisting of three segments, with a total length of 4 m, for measuring the evenness of road surfaces in the longitudinal and transverse direction according to "TP Eben - Contact Measurements, Edition 2007" must be the precision measuring tool of your choice if you want to work standardized.

Scope of delivery:

- 4 m ruler made of 3 with quick releases joinable segments
- measuring wedge

model	FWP FMR
overall length	4000 mm
Weight	ca. 15 kg
maximum length of the individual parts	1334 mm
Height including handles	239 mm
width of the measuring edge	18 mm
material	Aluminum hard-coated
maximum deflection	< 0,5 mm
maximum lateral deviation	< 1,5 mm
